REVIEW

What would you like to review?

HTML TAGS

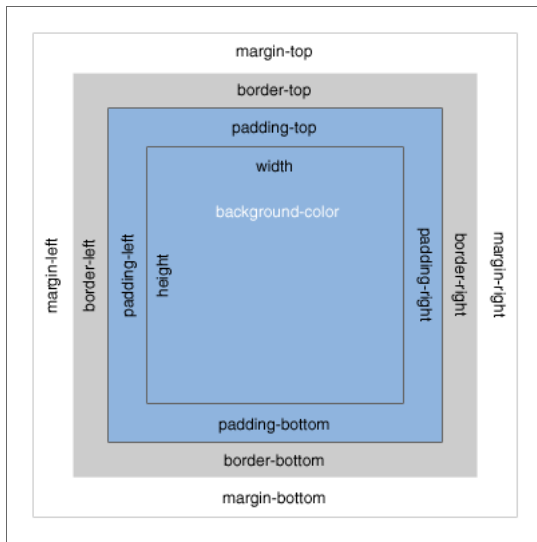

- header
- aside
- footer
- div
- section
- article

CLASS & ID

`.fluffy`

`#fun`

CSS TRICKS

CSS TRICKS

- float
- display: inline
- display: block

CSS UNITS

- em - based on current font-size (e.g. 1em = 12pt font-size)
- px - pixels
- % - relative to height or width of a parent element

CSS PSEUDO-CLASSES

LINKS

```
//unvisited link  
a:link {...}  
  
// mouse over link  
a:hover {...}  
  
// selected link  
a:active {...}
```

CSS PSEUDO-CLASSES

:FIRST-CHILD

```
//match the first <p> element
p:first-child {
    color: blue;
}

//match all <i> elements in all first child <p> elements
p:first-child i {
    color: blue;
}

//match the first child <p> element's first letter
p:first-of-type:first-letter {
    color: blue;
}
```

CSS3 TRANSITIONS

ADD AN EFFECT WHEN CHANGING FROM ONE STYLE TO ANOTHER

```
a {  
  color: #D00;  
  -webkit-transition: all 300ms;  
}  
a:hover {  
  color: #A00;  
}
```

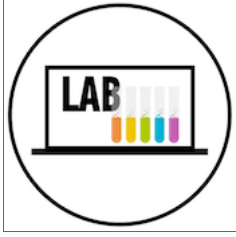

CSS3 TRANSITIONS

ADD AN EFFECT WHEN CHANGING FROM ONE STYLE TO ANOTHER

```
div {  
  -moz-transition-property: width; /* Firefox 4 */  
  -webkit-transition-property: width; /* Safari and Chrome */  
  -o-transition-property: width; /* Opera */  
  transition-property: width;  
}  
div:hover {  
  width: 300px;  
}
```

HOW TO START

- Div up the content
- When do I need a div, section or article?
- When do I need a class or id?
